DETAILED ACTION

Claim Objection

Regarding claim 1 the word "means" is preceded by the word(s) "for" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Haberlein et al (US 6,109,251).

As to Claim 1, Haberlein et al discloses a four stroke engine comprising: a crankcase 2; a crankshaft 5 supported for rotation within the crankcase 2; an oil reservoir 17 located within the crankcase 2; and means for vibrating (moving parts) the crankcase 2 to mist oil from the oil reservoir 17 to lubricate engine component, wherein the means for vibrating (moving parts) the crankcase 2 includes a vibration mechanism (moving parts) coupled to a portion of the crankcase 2. See column 2, lines 65-67; and column 3; line 1.

Allowable Subject Matter

Claims 11,14,15 are allowed.

Claims 2,3,5-10,20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 1/12/06 have been fully considered but they are not persuasive. Reference says rapidly moving parts cause an oil mist in the crankcase. It seems logical that the parts are directly vibrating the crankcase and the oil. The parts are the means for vibrating and they are coupled to the crankcase. **See column 2, lines 66-67; and column 3; line 1.**

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3747

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
